

## The Ultimate in Desktop Integration for Your Business

Zulu UC Desktop Integration unifies the most popular business communication tools & applications enhancing user productivity.

Designed specifically for FreePBX and PBXact phone systems, Zulu enables features such as click-to-call, Call Pop, SMS & Faxing directly into the desktop applications you already use like Microsoft Outlook and web browsers.

At the center of Zulu is a feature-rich softphone allowing users the freedom of mobility, taking their office with them.

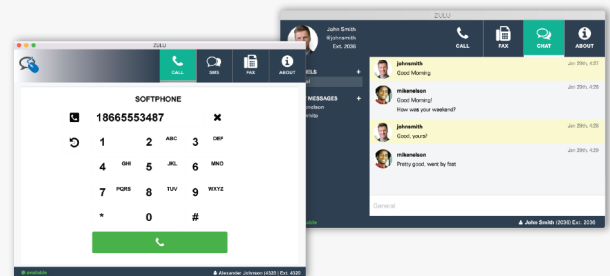

**“The only certified desktop integration solution for FreePBX & PBXact.”**

### Zulu UC Softphone

#### Click-to-Call

Zulu UC enables you to click-to-call within email, contact lists and websites. The Click-to-Call feature is currently supported for Microsoft Outlook 2010 or newer and Google Chrome web browser.

#### Call Pop

Call pop settings allow you to have the PBX inform Zulu to open a web browser on a per inbound route or queue level in your PBX GUI. This is ideal integration for CRM and Help Desk systems.

#### SMS

With SIPStation Trunking and SMS enabled, you can send SMS messages from the Zulu Widget. You can also receive SMS notifications direct from your desktop.

#### Faxing

If you have the Fax Pro module and Faxing enabled, you can send faxes from the Zulu UC Widget in addition to UCP. You can also view received faxes the same way you view emails in your Outlook Inbox.
